## Guidelines/Criteria for evaluation of proposals/requests for ground water abstraction (With effect from 16/11/2015)

#### 1. SCOPE & OBJECTIVE

The prime objective of the guidelines for evaluation of proposals/requests for the withdrawal of ground water, is to focus on a specific part of ground water management viz. ensuring sustainability of ground water both in terms of quantity & quality and also focus on land based management of ground water resources, looking into the variations of availability of water in different climatic regions and diverse hydrogeological conditions in various states of the country. Explanation for different technical terms used in this document is given in *Annexure I*.

The annual replenishable ground water resources availability plays an important role in defining the guidelines. These are re-assessed from time to time and the latest assessment, as applicable to these guidelines are available on www.cgwb.gov.in

The latest assessment of the state wise ground water resources as on 31.03.2011 is available at the Central Ground Water Board (CGWB) web site (http://cgwb.gov.in/documents/Dynamic%20GW% 20Resources%20-2011.pdf). As per the ground water resource estimates of 2011, out of the 6607 assessment units (Blocks, Mandals, Talukas, districts), 1071 over-exploited units, 217 critical units, 697 semi-critical units, 4580 safe units and 92 saline units have been identified across the country by Central Ground Water Board. The Annual replenishable ground water resources have been estimated as 433 Billion Cubic Metres (bcm). The Net Ground Water Availability is 398 bcm and the overall stage of ground water development of the country is 62%. The present guidelines will follow the assessment as on GWRE 2011 till it is revised.

Central Ground Water Authority (CGWA) so far has notified 162 areas (http://cgwb.gov.in) the areas are for the purpose of regulation of ground water development. More areas are notified periodically and the up dated list as applicable to these guidelines is available on www.cgwa-noc.gov.in. The District Administrative Heads (Deputy Commissioner/District Magistrate/District Collector) in case of Administrative Block or Taluka, or the Head of the Municipality (in case of Municipal Area) of the notified areas in the country have been appointed as 'Authorized Officers' by Central Ground Water Authority under Section 4 of the Environmental Protection Act (EPA) (1986).

Regulation of Ground Water development in Notified areas is through district administrative heads assisted by Advisory Committees under the provisions of Section 4 of the EPA, 1986. All issues pertaining to granting of NOC's for ground water

withdrawal, checking violations, sealing of ground water abstraction structures, launching of prosecution against offenders, attending to complaints, etc., are to be addressed by the Authorized Officers.

i. These guidelines supersede all the earlier guidelines with effect from 16/11/2015. The guidelines for abstraction of ground water in Notified/Non-Notified areas for various users are given below.

#### 2. NOTIFIED AREAS

Permission to abstract ground water through any energized means will not be accorded for any purpose other than drinking water. The permission would be granted by the Authorised Officer in consultation with the advisory committee constituted for this purpose. The list of notified areas, is given in *Annexure II* and also available on the web-site (www.cgwb.gov.in).

#### 2. 1. Drinking & Domestic purposes:

NOC can be accorded for construction of ground water abstraction structures/ replacement of existing defunct well for drinking and domestic purposes only. Government Water supplying agencies can be accorded NOC as per their requirement. NOC for infrastructure projects will be considered after issue of completion certificate from competent Authority as per Govt. norms for drinking and domestic purposes. NOC for ground water withdrawal will be considered only if Water Supplying Department is not providing adequate water in the area/premises. Proof for this is to be produced from the concerned authority by the applicant.

#### 4. ABSTRACTION OF SALINE GROUND WATER

Any Industry/project desirous of utilizing saline ground water, including from areas falling under over-exploited and Notified categories, would be permitted to extract saline ground water. However, due care to be taken in respect of disposal of the effluents by the units so as to protect the water bodies and the aquifers from pollution. Proposals pertaining to such cases must have a detailed project report elucidating the mechanism of handling the effluent water and its various uses. All precautions must be taken for protection of environment especially fresh water

aquifers in and around the area. Large scale recharge mechanism should be adopted wherever feasible in such cases to improve the ground water conditions in the region.

- (I) In Notified areas, withdrawal of saline water from deeper aquifers can be permitted subject to the following conditions.
  - (a) Saline water withdrawal shall not contaminate the fresh water aquifers while transporting or using.
  - (b) No brine or waste disposal should occur in that area.
  - (c) The withdrawal of saline water or pumping of the saline aquifer by industries/organizations, should not affect the fresh water aquifer, if any in the area.

  - (g) Adequate Rain Water Harvesting/Artificial Recharge/Water conservation measures should be adopted in consultation with Regional Director of CGWB.
- (II) In case of saline/contaminated water occurring within the phreatic zone or water logged area occurring as a pocket in notified area, withdrawal may be permitted for uses other than domestic use subject to:-
  - (a) The area shall be clearly demarcated and the respective Regional Director of CGWB shall give clear recommendation on the quantity which can be withdrawn.
  - (b) The withdrawal should not have any impact on the fresh water aquifer and this has to be ascertained by the concerned Regional Director, CGWB.
  - (c) Other conditions shall remain same as (1) above.

#### 5. CHANGE IN LAND USE

Industries/ Infrastructure/Mining projects coming up in agricultural land or any other land after change in land use shall have to submit all documents endorsing the change of land use from competent authority. Withdrawal of ground water from existing abstraction structures, if any, after change in land use in the area can be done

only after approval from the Central Ground Water Authority. Cases would be processed as per changed land use.

#### 6. OTHER CONDITIONS (Applicable for all cases):

- a) Sale and supply of raw/unprocessed/untreated ground water by unauthorized agencies for commercial use is not permitted.
- b) Non-compliance of conditions mentioned in the NOC may be taken as sufficient reason for cancellation of NOC accorded/ non-renewal of NOC.
- c) Wherever State Government Authorities are in existence to manage and control ground water regimes, the Ground water Regulation would be done by them. The State Ground Water Authority (SGWA) shall send a quarterly progress report to CGWA for records.
- d) In case of any delay in executing the project for bonafide reasons within the set time, for which NOC has been granted, the firm shall apply to CGWA for extension. CGWA may consider extension based on its merits. Any proposal to extend the validity of NOC would be considered for a similar period with recharge conditions applicable as per guidelines in force, provided no ground water abstraction has been made.

Thereafter, NOC's shall be renewed every five years subject to the compliance of the conditions mentioned in the renewed NOC.
- b) Renewal of NOC's issued earlier to industries/projects in non-notified areas and where the area has subsequently become notified, will be done by CGWA for every two (2) years. The Authorized officer will forward the application to the concerned Regional Director of CGWB with his recommendations for processing and forwarding to CGWA.
- c) In case of change in category of the area, renewals would be granted with conditions as laid down for such new category areas. In case it is difficult to comply with the conditions the applicant should satisfy the authority for granting exemption/alternative measure. The condition of recharge may be relaxed for OE blocks at par with Critical blocks and for Critical blocks at par with semicritical blocks.

- e) Categorization of certain industries as 'Water intensive industry' have been made with effect from 15.11.2012. Since then ground water withdrawal by such industries is not permitted in OE areas. Renewal of NOC for those water intensive industries to which NOC was issued for ground water withdrawal prior to 15.11.2012 and are now falling in Over-exploited and Notified areas will be done by CGWA initially for two years and subsequently for every three years. For Notified areas, the authorized officer shall forward his recommendations to the Regional Director who in turn would send the same alongwith his recommendations to CGWA. The renewal would be limited to 50% of the recharge quantity or the earlier permitted quantity whichever is less.

#### **Guidelines For Installation of Piezometers and their Monitoring**

Piezometer is a borewell/ tubewell used only for measuring the water level by lowering the tape/sounder or automatic water level measuring equipment. It is also used to take water sample for water quality testing whenever needed. General guidelines for installation of piezometers are as follows for compliance of NOC:

- The piezometer is to be installed/constructed at the minimum of 50 m distance from the pumping well through which ground water is being withdrawn. The diameter of the piezometer should be about 4" to 6".
- The depth of the piezometer should be same as in case of the pumping well from which ground water is being abstracted. If, more than one piezometers are installed the second piezometer should monitor the shallow ground water regime. It will facilitate shallow as well as deeper ground water aquifer monitoring.
- The measuring frequency should be monthly and accuracy of measurement should be up to cm. The reported measurement should be given in meter upto two decimal.
- For measurement of water level sounder or Automatic Water Level Recorder (AWLR) with telemetry system should be used for accuracy.
- The measurement of water level in piezometer should be taken, only after the pumping from the surrounding tubewells has been stopped for about four to six hours.
- All the details regarding coordinates, reduced level (with respect to mean level), depth, zone tapped and assembly lowered should be provided for bringing the piezometer into the National Hydrograph Monitoring System of Central Ground Water Board, and for its validation.
- The ground water quality has to be monitored twice in a year during pre-monsoon (May/June) and post-monsoon (October/November) periods. Quality may be got analyzed from NABL approved lab. Besides, one sample (1 lt capacity bottle) of ground water collected during pre-monsson after proper packing may be sent to the concerned Regional Director, Central Ground Water Board, for chemical analysis.
- A permanent display board should be installed at Piezometer/ Tubewell site for providing the location, piezometer/ tubewell number, depth and zone tapped of piezometer/tubewell for standard referencing and identification.
- Any other site specific requirement regarding safety and access for measurement may be taken care off.
